## *NO STONE UNTURNED: How My Special Needs Child and I Transformed Against All Odds*

This is a true account of never giving up hope. It begins when her son was born at twenty-nine weeks with a devastating prognosis: stage four brain hemorrhage with hydrocephalus. She was told, "If he survives, it is likely he will have severe brain injury and probably never walk." Debra believed in possibilities and the power of the mind to untap his unused portion of his brain to compensate. Early researching and trials of various techniques and modalities from different cultures, centuries, and belief systems guided their decades long journey.

Debra Taubenslag holds a Doctorate in Clinical Hypnosis, and two teaching degrees; Special Education, and Speech and Theater.

Debra has gained much experience in the area of public speaking and has presented worldwide presentations to corporations, holistic centers and hypnosis conventions. She is the author of two books. Her new release, *NO STONE UNTURNED: How My Special Needs Child and I Transformed Against All Odds* was written to help caregivers like herself find meaning and thrive. Her first book, *Not Crazy Just Enlightened* published in 2000, resulted in a national nineteen-city book tour where she educated the public by conducting metaphysical stage hypnosis shows.

Through the development of her own spiritual awareness, her mission is to help people discover their true purpose, why they are here, and what they need to accomplish.
